Application No.: 09/611,257 Docket No.: 381092000721

CLAIM AMENDMENTS

- 1. (currently amended): A recombinant DNA molecule which comprises an expression cassette wherein said expression cassette comprises a nucleotide sequence encoding a T-type calcium channel α_{1G} subunit, said encoding sequence operably linked to control sequences to effect its expression; wherein said α_{1G} subunit has an amino acid sequence at least 99% homologous identical to SEQ. ID. No.: 24 or has an amino acid sequence identical to SEQ. ID NO. 37.
- 2. (previously presented): The DNA molecule of claim 1 wherein said α_1 subunit has the amino acid sequence of SEQ. ID NO. 37.
 - 3. (canceled)
- 4. (previously presented): Recombinant host cells modified to contain the DNA molecule of claim 1.
 - 5. (original): The cells of claim 4 which are mammalian cells.
- 6. (previously presented): A method to effect production of a recombinant functional calcium channel which method comprises culturing the cells of claim 4 or 5 under conditions wherein said functional calcium channels are produced.

7-13. (canceled)

14. (currently amended): An isolated nucleic acid molecule which comprises a nucleotide sequence encoding a T-type calcium channel α_{1G} subunit or its <u>full-length</u> complement, wherein said α_{1G} subunit has an amino acid sequence at least 99% homologous <u>identical</u> to SEQ. ID. No.: 24 or has an amino acid sequence identical to SEQ. ID NO. 37.

15-17. (canceled)

Application No.: 09/611,257 Docket No.: 381092000721

18. (currently amended): The isolated nucleic acid molecule of claim 14, wherein said α_{1G} subunit has [[the]] an amino acid sequence [[of]] identical to SEQ. ID NO. 37.

- 19. (currently amended): The DNA molecule of claim 1 wherein said α₁ subunit has [[the]] an amino acid sequence [[of]] identical to SEQ ID NO: 24.
- 20. (previously presented): Recombinant host cells modified to contain the DNA molecule of claim 2.
 - 21. (previously presented): The cells of claim 20 which are mammalian cells.
- 22. (previously presented): Recombinant host cells modified to contain the DNA molecule of claim 19.
 - 23. (previously presented): The cells of claim 22 which are mammalian cells.
- 24. (previously presented): A method to effect production of a recombinant functional calcium channel which method comprises culturing the cells of claim 20 or 21 under conditions wherein said functional calcium channels are produced.
- 25. (previously presented): A method to effect production of a recombinant functional calcium channel which method comprises culturing the cells of claim 22 or 23 under conditions wherein said functional calcium channels are produced.
- 26. (currently amended): The isolated nucleic acid molecule of claim 14, wherein said α_{IG} subunit has [[the]] an amino acid sequence [[of]] identical to SEQ ID NO: 24.
